

# Casella

## light meter

New for 2011 the Casella Light Meter. Manufactured to a high quality this simple to use light meter has plenty of features.

Its flexible cable allows you to position the sensor just where you want it and a hold button allows you to freeze the display while you make a note of the reading. There are different ranges to choose from which increases the flexibility of this popular model.

It also has a min/max function, a zero adjustment function and all in its own case.

### Technical data:

|                                  |   |
|----------------------------------|---|
| <b>Measuring range</b>           | 20, 200, 2000, 20000, 200,000 Lux<br>20, 200, 2000, 20,000 fc                                   |
