

HANDHELD THERMOHYGROMETERS

E200

The outstanding feature of this unit is that it measures a variety of parameters including temperature, relative humidity, dew point *and* absolute humidity. It also includes all the facilities, such as min/max and hold buttons that you would expect in a monitor of this quality.

The E200 pocket handheld thermohygrometer offers easy one hand operation via its thumb wheel control. This gives you the ability to use the instrument whilst still having one hand free for note taking etc

The unit can also be calibrated by the user with an optional calibration chamber and salts. This will maintain your confidence in the accuracy of the readings and prolong the useful life of the unit. The fact that calibration can be carried out quickly and simply in-house saves both downtime and money as the unit does not need to be sent away for calibration.

Calibration chamber and pack of 4 salts

TECHNICAL DATA

TECHNICAL DATA	E200
MEASUREMENT RANGE	5 - 95% RH
ACCURACY	± 3% RH
PROBE CALIBRATION	Single point RH
ILLUMINATED DISPLAY	No
DISPLAY TEMPERATURE / RELATIVE AND ABSOLUTE HUMIDITY / DEW POINT	Yes
MIN/MAX/AVG & HOLD FACILITIES	Yes
DIMENSIONS	175x48x25mm
BATTERY TYPE	9v (PP3)
WEIGHT	Approx 200g
