

# TINYTAGDATA LOGGERS

## TINYTAG ULTRA 2

The successor to our best selling logger the Tinytag Ultra, the Ultra 2 has more memory and improved resolution. Designed for enclosed environmental monitoring. When hanging the sensor has good protection from water and dust.

Many model variations available.

<b>MEMORY CAPACITY</b>	up to 32,000 readings
<b>TEMPERATURE RANGES FROM</b>	-40°C to +125°C (depending on variant)
<b>RELATIVE HUMIDITY MODELS</b>	0 to + 100%RH

## TINYTAG VIEW 2

The Tinyview is ideal for applications where an insitu reading of the environment is vital. Available in blue or grey and with or without an external sensor. A VIEW 2 datalogger with external probe is available for monitoring inside display cases.

Many model variations available

<b>MEMORY CAPACITY</b>	up to 30,000 readings
<b>TEMPERATURE RANGES FROM</b>	-200°C to +300°C (depending on variant)
<b>RELATIVE HUMIDITY MODELS</b>	0 to + 100%RH

## TINYTAG PLUS 2

The latest version of the Tinytag Plus range. The Plus 2 has more memory and improved resolution. Designed for tough locations where most loggers would be easily damaged. Ideal for environmental monitoring due to waterproofing and large sensor range.

Many model variations available • Shock and vibration models available

<b>MEMORY CAPACITY</b>	up to 32,000 readings
<b>TEMPERATURE RANGES FROM</b>	-200°C to +300°C (depending on variant)
<b>RELATIVE HUMIDITY MODELS</b>	0 to + 100%RH

## EXPLORERSOFTWARE

This Windows based program is simple and intuitive and allows users to easily manage their data loggers and recorded data.

A step-by-step launch page guides the user through the set up of a logger and a printable confirmation screen then verifies the settings the unit has been started with.

When offloaded, recorded data is initially presented as a graph but it can also be displayed as a table of readings and there is a linked information view that summaries details of the data being shown.

Data can easily be exported from all three views into programs such as MS Excel and Word, either by file or by simply copying and pasting.

**Other models are available in the Tinytag range - please contact us with your requirements**
