

Testo 608

thermohygrometer

Testo have an excellent reputation for manufacturing accurate and stable relative humidity and temperature sensors. The 608 is available in two variants, the H1 and the H2. Both models are battery operated units that offer a nonstop display of relative humidity, dewpoint and temperature.

They are both able to store a record of the minimum and maximum readings since they were last reset and display a low battery warning when the battery needs to be replaced..

The 608-H2 offers a more accurate sensor at +/- 2% RH and has a visual alarm on the upper and lower limit set for temperature, relative humidity and dew point. It includes a traceable calibration certificate at one point of temperature and 3 points of relative humidity.

Technical data: H1 / H2

Measuring Range	
Temperature	0...+50°C (-10...+70°C)
Humidity	10...95 %rh (2...98%rh)
Accuracy	
Temperature	± 0.5°C at 25°C (± 0.5°C at 25°C)
Humidity	H1 ± 3 %rh (10...95%rh)
	H2 ± 2 %rh (2...98%rh)
Battery (life)	1 x 9V PP3 (8736 hours)
Dimensions (H x W x D)	120mm x 89mm x 40mm
Weight	168g
